

Privacy Law 2018

In The Netherlands the European "General Data Protection Regulation" (GDPR) law will be enforced at May 25th 2018.

It is about the export of personal data outside the EU and storage of your personal data

Privacy Statement

Moree & Vermeer uses customer data only within our own organisation. Customer data is not shared with other companies and is stored on our private company servers. Our private company servers run at high security level.

Cookies and (tracking) scripts

Our websites do not track on visitors and there are no tracking scripts. Cookies are only used for browser session variables for shopping cart and PDF catalogue.

Secured https web connection

On our websites there is no exchange of trusted data like login and bank account data. Therefore there is no need for an SSL certificate.

Online Data Storage

Our websites only store session data (for example shopping cart). This data deletes automatically at the end of the browser's session.

Offline Data Storage

Moree & Vermeer stores customer data (name, address, zipcode, city, country, email address, telephone, website, bank account and bank transactions) for procurement, quotations, invoices and accounting/bookkeeping.

Permission

Moree & Vermeer B.V. does not ask customers, suppliers, website and email users for permission to use their personnel data, because we only use minimal necessary data for our company. (See Dutch AP statement).

Soms heeft u toestemming nodig

Let op dat u geen persoonsgegevens verwerkt die niet noodzakelijk zijn voor de uitvoering daarvan. Doet u dat wel? Dan moet u daarvoor rechtsgeldige toestemming of een andere grondslag hebben.

Voorbeeld: als u online een product verkoopt, moet u adresgegevens verwerken om het product bij iemand te kunnen bezorgen. Wilt u de persoonsgegevens daarnaast ook nog gebruiken om het koopgedrag van iemand te analyseren? Dan moet u hiervoor rechtsgeldige toestemming hebben van de betrokken persoon.

Personal data or delete request

According to this European GDPR law everybody can request for what personal is stored and even request deletion. We are very happy to help you with that request, but we charge you 100 Euro in advance for this request.

A delete request is also possible, but Moree & Vermeer is not allowed to delete recent bank transactions and accounting/bookkeeping data because the Dutch tax office demands 7 years of storage.
